Figures are placeholders. Nothing has been invented — these fill in when SHUMI has numbers it can stand behind, and the section comes out entirely if it does not.

PALETTE

	Bone	#F2EDE6	Primary ground
	Ink	#14100E	Text · 16.2:1
	Wine	#4A1228	Second ground · 12.8:1
	Rose	#A8265C	The working pink · 5.8:1
	Brand pink	#E85D9E	Dark grounds & display only

The logo pink measures **2.78:1 on bone and fails AA for text**. It is legal and beautiful on ink (5.85:1) and wine (4.61:1). So the system runs two pinks: rose carries meaning on light, brand pink carries the brand on dark.

FOCUS

No cards, no rounded corners, no drop shadows. Separation comes from hairlines, ground changes and space — which is what keeps it feeling like a publication rather than a template.
